

HeartCentrix[®] connectivity solutions

AT THE HEART OF SAVING
LIVES[™]

HeartCentrix® by Cardiac Science

A superior connectivity solution for your EMR system.

For physician offices, HeartCentrix is the only solution that connects your Burdick® and Quinton® equipment to your EMR system. HeartCentrix is an innovative middleware solution that allows your ECG, stress, and Holter devices to upload test results directly to the EMR for review and editing – anywhere, anytime.

That makes your life simpler so you can spend more time with patients.

HeartCentrix delivers the accuracy and dependability you expect from Cardiac Science, a diagnostic leader for almost a century now. Plus, with 20 years of informatics knowledge and ECG data management experience, you can depend on Cardiac Science to improve your day-to-day workflow.

Seamless and convenient communication.

HeartCentrix is a powerful connectivity solution, yet is easy to understand and use. Its familiar Windows®-based interface flows left to right in a logical progression. Quite simply, it helps you do more with the time you have. Using a single sign-on from within your EMR, you can:

- + Download orders and patient demographics directly to your Burdick® and Quinton® ECG, Holter, and stress diagnostic devices – save time and paper, eliminate errors, and ensure patient safety.
- + Upload results back to the EMR after tests are performed.
- + Review and edit test results at the office or any remote location – at your convenience!

The HeartCentrix user interface is streamlined and straightforward – speedily access and view test results.

Device connectivity and multi-modality.

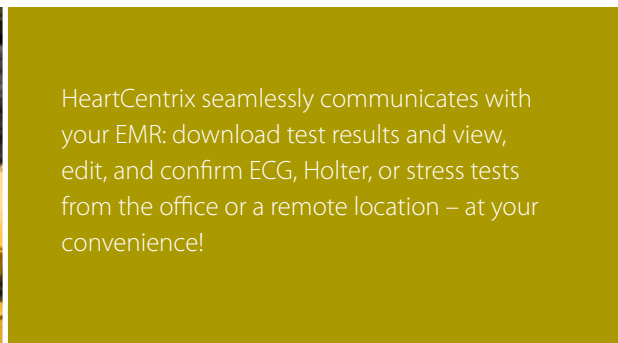

Continue using your existing clinical equipment – HeartCentrix easily communicates with your current Burdick and Quinton devices. ECG, Holter, and stress test results are readily accepted by HeartCentrix and transferred to your EMR system for review. Superior connectivity features allow speedy, reliable, and secure test information transfer.

And to save even more time and reduce transcription errors, many Burdick and Quinton devices communicate bi-directionally with HeartCentrix – download orders and patient demographics directly to those devices, run the tests, and quickly upload results back to your EMR – that's fast and efficient!

Productivity tools to access test results anywhere, anytime.

Sometimes a situation demands that you review ECG test results right now! But you may be miles from the patient. HeartCentrix solves that dilemma by providing the flexibility you need.

- + For immediate access, log in from home, the office, the clinic, or the hospital. Only a single sign-on is required because HeartCentrix interfaces with your EMR.
- + HeartCentrix provides diagnostic quality presentation and on-screen serial comparisons – a must for reading 12-lead ECGs.
- + When you're done editing, all changes to the clinical record are stored and accessible in your EMR system – it's fast and simple.

What's new in 6.2 – Here's four ways we've improved on a good thing:

- + HeartCentrix 6.2 interfaces with the Burdick Universal ECG, a significant benefit for PC-based applications.
- + HeartCentrix 6.2 is certified with the Allscripts® UAI interface.
- + HeartCentrix 6.2 supports VISTA and remains Windows-compatible.
- + HeartCentrix 6.2 allows local printing, supplementing EMR systems' printing capabilities.

“Since installing HeartCentrix, our workflow for ordering, performing and confirming tests has been greatly streamlined. With HeartCentrix we can now order, view and confirm tests in our PrimeSuite EHR within the patient's chart. The new process has ensured that correct patient demographics are captured in the test, has eliminated the risk of misplacing tests and has eliminated scanning completely. The doctors are now able to access test results from multiple sites and even from home allowing us to provide a higher level of patient care. Thank you Cardiac Science for providing this valuable solution for our practice.”

Maria Benson
Practice Administrator,
Cardiovascular Physicians of North Atlanta

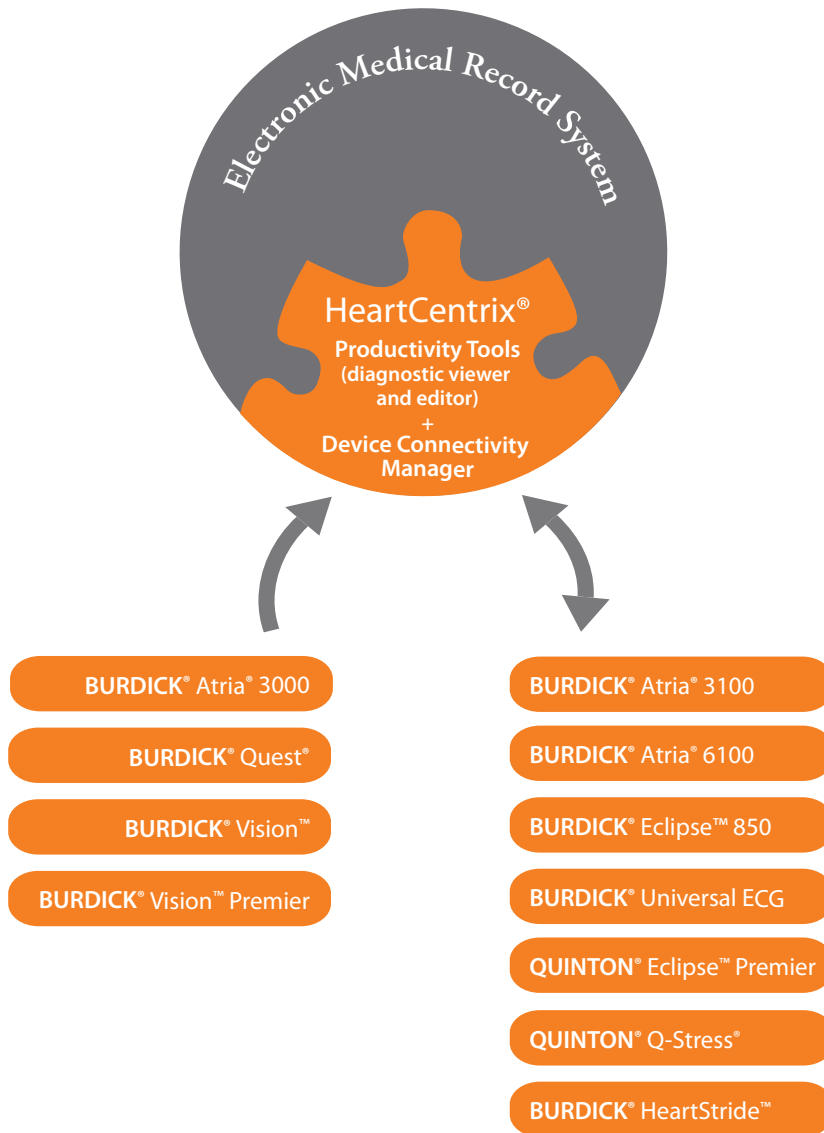

Service and Customer Care.

“Servicing” your account is one thing. Caring about you and your needs is something else entirely. We at Cardiac Science take customer care very seriously – HeartCentrix is supported by on-site implementation and training. When responding to a service request or answering a question over the phone, we commit to the standard of care you expect of a world-class organization – you can depend on us.

Cardiac Science is there when you need us.

Protect your Cardiac Science investment with the HeartCentrix service contract. It provides you with free product upgrades to keep you current with the latest feature set. From point of sale to ongoing support, our professional services staff ensures you'll have a superior customer experience.

HeartCentrix has bi-directional communications with many Burdick or Quinton ECG, Holter, and stress devices. Easily download test orders, run tests, and then upload the results to your EMR – what could be faster?

"The efficiency of our office has significantly improved with the addition of HeartCentrix to our GEMMS ONE® system. Prior to this implementation, we were still scanning multi-page stress-echo and resting ECG test results. Now the results are transferred to the patient's chart electronically.

The process is considerably less time consuming, far less expensive, and the images are higher quality."

Rhonda Mayo, RN
Clinical/Nursing Supervisor
at Heart Center - Arkansas

Warranty features

- + Toll-free technical support
- + Remote system access
- + Product upgrades
- + 1-year (renewable)

Ordering information

Please contact your local Cardiac Science representative to order these HeartCentrix products.

H50-1A	HeartCentrix software
H50-1B	HeartCentrix ECG modality license
H50-1C	HeartCentrix Holter modality license
H50-1D	HeartCentrix stress modality license
H50-1E	HeartCentrix all-modality license
10-00204-01	HeartCentrix upgrade (6.1-6.2) + Burdick Universal ECG interface + Diagnostic tests can be printed locally + Allscripts Touchworks EHR interface
STCS-HTCX	HeartCentrix service contract
